File No. V-14/11/15/2014 – Med – I (Policy)

Dated: 19.09.2014

To

The Medical Superintendent
ESIC Hospital,
.....

Subject: Decisions taken by the ESI Corporation at its 162nd meeting held on 31.07.2014, for overall improvement in delivery of medical care under the ESI Scheme.

Sir,

Action is required to be taken on the following points with respect to the subject mentioned above:

1. An average of last three years' work load of IPD in a hospital should be considered for the assessment of staff requirement. If the average of bed occupancy of last three years is 80% and above and the bed occupancy of the previous year more than 85% remedial measures shall be taken to enhance the bed strength and staff, depending upon the availability of ready built space, with an aim to bring down the bed occupancy below 70%. However, the first attempt should be to make available full strength of sanctioned staff for the original bed strength. (3.7d)
2. CCTV system needs to be installed in entrances, exits, parking area, emergency department and other vantage points. This will contribute in increasing efficiency of staff and for monitoring safety of crucial hospital areas etc. (3.10a)
3. Good signage system shall also be installed at all Health Institutions. Public address system can however be optional and need based. (3.10b)

This issues with the approval of competent authority.
